DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smolka et al. [5,327,049] in view of Piejak et al. [5,325,024].

Smolka et al. disclose a low pressure gas discharge lamp [figure 1] comprising a discharge vessel [1] and a capacitive coupling-in structures operating at a frequency of between 10 and 800 Mhz wherein the capacitive coupling-in structure formed of an oxide ceramic material.

Smolka et al. disclose the instant claimed invention except for: the coupling-in structure being formed of a plurality of structures.

Piejak et al. discloses a low pressure fluorescent lamp having a plurality of coupling-in structures.

It would have been obvious to a person having ordinary skill in the art at the time invention was made to use the coupling-in structures design of Piejak et al. with Smolka et al. for the purpose of improving ionization.

Regarding claims 3-5, and 9-10, Verhaar et al. disclose the claimed invention except for the specific operative ranges/values. It would be obvious to one of

ordinary skill in the art at the time of the invention was made to chose the specified ranges/values, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable range/value involves only routine skill in the art.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kraus et al. [6,507,151].
